

9 June 1983

READ & DESTROY

MEMORANDUM FOR: Deputy Director for Administration

FROM: Daniel C. King
Director of Logistics

SUBJECT: Report of Significant Logistics Activities for
Period Ending 9 June 1983 []

25X1

1. Progress Report on Tasks Assigned by the DCI/DDCI:

No tasks assigned during this reporting period. []

25X1

2. Items or Events of Major Interest that have Occurred During the Preceding Week:

a. Power Plant Outage: A scheduled outage of the Headquarters power plant was successfully conducted on the 3 through 5 June weekend. During this period, the mechanical and electrical connections for the new cooling tower were completed, as well as maintenance work on the 480V and 4160V switchgear. The cooling tower connection phase was accomplished quicker than scheduled, allowing chilled water service to be returned to the SAFE computer center at 0930 hours on Saturday, about 14 hours sooner than planned. From a utilities reliability standpoint, the maintenance work on the 480V switchgear was a major accomplishment as it can only be done during an entire plant shutdown, which is rare. []
